SUMMARY

Mobile Engineer with 6+ years shipping production apps, specialized in fintech and digital banking. Flutter is my core stack, and I also build with React Native and React on my own products. On ueno bank's Mobile Core team I build the technical foundation used by 40+ microapps. I use AI daily in my workflow (Claude Code, Cursor, Copilot) and integrate it into products and internal tools.

EXPERIENCE

Software Engineer — Mobile Core

Aug 2025 – Present

itti · ueno bank (Paraguay) · Remote · Flutter

- Build core features and components consumed by 40+ microapps, integrated as packages into the main app.
- **Native real-time feature flags:** changes reach users in ~1 second, down from up to 24 hours with Firebase Remote Config.
- **AI-powered What's New generator:** analyzes each microapp's changes and writes release notes for every section of the app.
- Own the release and deployment of ueno bank to the App Store and Google Play.

Semi-Senior Flutter Developer

Aug 2024 – Aug 2025

OneInfo Consulting · Hybrid

- Developed, maintained and shipped releases of one of Argentina's most widely used digital wallets, plus an internal app for the same client.

Freelance Flutter Developer

Jan 2024 – Aug 2024

International clients · Remote

- Features, bug fixing and Firebase Analytics for Billetero (European crypto wallet) and US projects through 52six.

Mobile Developer

Sep 2019 – Jan 2024

Miiii · Nordelta, Argentina

- Grew from IT Trainee to mobile team lead (2022), mentoring 2 interns; built in-house and client apps end to end in Flutter.

Own products — Flutter & React Native

Ongoing

Byto Apps · Independent

- **RentAr** (co-founder, tech lead): React Native app and React web app on Supabase; AI reads the lease and alerts rent increases.
- **Fundido** (personal finance with an AI chatbot), **Laburito** (tradespeople marketplace, USAL capstone) and **Fishar** (social network for anglers).
