SUMMARY

AI Engineer with 6+ years building mobile products, specialized in fintech and digital banking. I bring AI into both the product and the development process: internal LLM-powered tools that automate workflows, and agentic coding with Claude Code, Cursor and GitHub Copilot. Currently on the Mobile Core team at ueno bank, building the technical foundation used by 40+ microapps.

EXPERIENCE

Software Engineer — Mobile Core

Aug 2025 – Present

itti · ueno bank (Paraguay) · Remote

- **AI-powered What's New generator:** scans every microapp project, analyzes its changes with an LLM and writes release notes for each section of the app.
- **Native real-time feature flags:** changes reach users in ~1 second, down from up to 24 hours with Firebase Remote Config.
- Build core mobile features and components consumed by 40+ microapps, integrated as packages into the main app.
- Own the release and deployment of ueno bank to the App Store and Google Play.

Semi-Senior Flutter Developer

Aug 2024 – Aug 2025

OneInfo Consulting · Hybrid

- Developed and maintained one of Argentina's most widely used digital wallets, plus an internal app for the same client.
- Shipped releases to the App Store and Google Play.

Freelance Flutter Developer

Jan 2024 – Aug 2024

International clients · Remote

- Features, bug fixing and Firebase Analytics for Billetero (European crypto wallet) and US projects through 52six.

Mobile Developer

Sep 2019 – Jan 2024

Miiii · Nordelta, Argentina

- Grew from IT Trainee to mobile team lead (2022), mentoring 2 interns.
- Built in-house and client apps end to end in Flutter.
